Profile

I'm a curious Italian guy with a huge passion for the industry that, during the years, learned a bunch of programming languages and developed a considerable amount of skills.

After focusing my studies on artificial intelligence, I worked as a full stack developer and as IT support technician for a while, before moving to Dublin.

Here, I picked up a few contracts as a freelancer and worked as an IT one man army for a startup company related to the world of financial trading before moving to the CRM customization trade.

I am now focusing on my education with a MSc in Computer Science. I'm always hungry for knowledge and looking for new experiences.

Experience

Software Developer, ProvidentCRM Feb 2019-Sep 2020

- Customization and deployment of Sugar CRM environments
- CSS, HTML, PHP, MySQL, Javascript, Sugar CRM, UI/UX Design, Linux server management, MACOSX Environment

IT Support / Full Stack, Bizintra Oct 2017-Dec 2018

- I've done everything from building websites and apps to maintain virtual machines, hardware and software. An IT one man army.
- CSS, HTML, PHP, MySQL, Javascript, Wordpress, SEO, CDN, CRM, UI/UX Design, Unix

Freelance Full Stack Developer Apr 2015-Aug 2017

- Freelance Full Stack Developer during the day, Bartender during the night. A bit like Batman without the "being rich" part.
- CSS, HTML, PHP, MySQL, SEO, UI/UX Design, Linux Hosting

Full Stack Developer, Microsolution Oct 2014

- I built from scratch the website and two databases. I also had to integrate my work with the previous database and website.
- CSS, HTML, PHP, MySQL, SEO, UI/UX Design, Linux Hosting

IT Support, Centro del Colore Jul 2014-Sep 2014

- I was repairing and maintaining computers and special hardware and writing HTML/CSS inline e-mails. I also made the website.
- CSS, HTML, PHP, SEO, UI/UX Design, Linux Hosting

Traits

Problem Solving

Programming Languages Variety

Attention to Detail

Rapid Learning

Self-management
